Experience

JUNE 2025 - PRESENT

C&S Wholesale Grocers, Remote – *Transportation Modeling Analyst*

- Formulate outbound grocery delivery operations as a vehicle routing problem (CVRPTW), encoding capacity, time window, and routing constraints for use in a proprietary Julia-based optimization solver
- Evaluate what-if scenarios (e.g., new customers, constraint changes, delivery schedule adjustments) to support network-level decision making
- Present quantitative results to stakeholders, translating model outputs into actionable operational recommendations

JUNE 2024 - SEPTEMBER 2024

United Parcel Service, Ontario, CA – *Industrial Engineering Intern*

- Led process improvement project reducing route stop time, generating \$29,872.92 in annual savings
- Wrote SQL queries to extract and validate operational data for ROI analysis
- Built Power BI dashboards tracking KPIs for package sorting performance

JUNE 2023 - AUGUST 2023

General Atomics, San Diego, CA – *Supply Chain Intern*

- Designed Excel-based tool to standardize subcontractor data tracking and improve reporting efficiency

Education

GRADUATED JUNE 2025

University of California, Riverside – *Bachelor of Science, Business Administration*

- Minor in Mathematics
- GPA: 3.77

Skills

- Julia, Python, R Programming
- Microsoft Excel
- Mathematical Optimization
- Machine Learning Algorithms
